- Wide sound bar dimensions (25 mm)
- Magnetic sound bar holder
- 3 extra bars included
- New SCH 4 mallets included
- international and German versions available

SONOR strives to offer the best percussion instruments to enrich the musical journey of our customers. Our latest Glockenspiel innovation provides a pure bell-like tone with optimum resonance for use in Orff classrooms and ensembles. The new Meisterklasse models expand the SONOR sound variety in the field of premium glockenspiels as they come along with an exciting new feature: pure steel tone bars. A perfect supplement for the existing Meisterklasse glockenspiels featuring aluminum bars.

MSB S Meisterklasse Soprano Glockenspiel

MSB A Meisterklasse Alto Glockenspiel

16 bars; c2-a3; C-major scale with f#2, bb2 and f#3; profiled steel sound bars 25 x 3 mm; precision-tuned to A440; incl. 1 pair SCH 4

German (DE) and international (INT) note name versions available

HIGHLIGHTS

Innovative steel bar material:

A new material composition of stainless steel provides a pure sound with optimized resonance while offering durability, stability and resistance against fingerprints and scratches. The profiled surface gives the bars a natural, visually appealing look.

New plastic head mallet

The new instrument is equipped with a new mallet (SCH 4), which makes the sound of the steel bars particularly pleasant. The handle with grip fits the player's hands comfortably.

Magnetic bar holder

Just attach the bars to the resonator box and you'll always have them close at hand.
