ONE of a KIND

BLACK LIMBA

Exclusive masterpieces, handcrafted artistry.

Every One of a Kind drum is a hand-built masterpiece, crafted by the experienced artisans at the SONOR factory in Germany. This year SONOR has chosen a regular 13"x6.5" medium maple shell with 45° bearing edges as the base for its One of a Kind Snare Drum. The shell is veneered with precious and very beautiful Black Limba on the most inner and outer ply. A very limited supply of the veneer only allows for an exclusive production of 80 Snare Drums. As always, the outer veneer is finished in a high-gloss lacquer to accentuate the individuality and naturally grown elegance of the wood.

Moreover, this newest iteration in the One of a Kind series also introduces previously unseen features. For the first time SONOR uses mounting hardware from the Vintage Series on a One of a Kind Snare Drum. Additionally, these parts are ruthenium plated, which has been unprecedented before.
